

CONTENTS

INTRODUCTION.....	1
PHYSICS OF PHASE CONTRAST MYCROSCOPY.....	3
WET MOUNT PREPARATION.....	7
Material.....	7
• Cervico-vaginal wet mount technique.....	7
• Advantages of a wet mount.....	8
• Disadvantages of a wet mount.....	8
• Technical tricks.....	9
• Urocytogram	9
• Urinary epithelium.....	11
• Different wet mounts.....	18
CLINICAL CORRELATES.....	19
Hormone status.....	19
Cervico-vaginal infections	48
• Vaginal lactobacillosis	50
• Bacterial vaginosis	51
• Aerobic vaginitis	55
• Syphilis	55
• Chlamydia trachomatis.....	57
• Gonorrhea.....	58
• Candidiasis	65
• Alternaria	72
• Dermatophytosis.....	75
• Actinomycetes.....	77
• Trichomoniasis	83
• Human Papillomavirus	86
• Herpes Simplex Virus	101
• Cytomegalovirus	107

Squamous metaplasia	108
Cell-mediated immunity	126
Localization of occult bleeding and inflammation	134
Post coital spermatozoa morphology and mobility	134
Presence of dyskaryotic or atypical cells	134
REFERENCES.....	145
DIRECT MICROSCOPY IMMERSION	147
