Editors	V	5. Helicopter Emergency Medical Services	41
Contributors	VI	<i>Iztok Tomazin, Patrick Fauchère, Günther Sumann</i>	
Foreword	XI	Background	41
Preface	XIII	History	42
		Epidemiology	43
		Advantages of Air Rescue in the Mountains	44
		Basics of HEMS in the Mountains	44
		Recommendations	48
Section I General Considerations	1		
1. Introduction to Mountain Emergency Medicine	3	Section III Education and Training	59
<i>Hermann Brugger, Ken Zafren, Luigi Festi</i>			
Acknowledgements	5	6. Education and Training	61
2. History of Mountain Rescue	7	<i>Monika Brodmann Maeder, Steven Roy, Jason Williams, Mike Greene</i>	
<i>Giancelso Agazzi</i>		Introduction	61
History of Mountain Rescue	7	Theories of Adult Learning	62
Mountain Rescue Stories and Accidents Around the World	13	Programme Design	63
People	16	Teaching Methods	65
Search and Rescue Dogs	20	Concrete Planning of Learning Activities	68
ICAR	21	Tips for Successful Teaching	70
3. Mountain Rescue Challenges	23	Student Assessment	70
<i>Oliver Reisten, Oliver Kreuzer, Michèle Imbasly, Philipp Venetz</i>		Programme Evaluation	71
Introduction	23	Diploma Courses in Mountain Medicine	71
General Considerations	23		
Rescue Team Culture	26	Section IV Equipment	75
Knowledge and Skills	26		
Section II Current Status in the World	31	7. Technical Equipment, Rescue Techniques, and Communication	77
		<i>Oliver Kreuzer, Danica Barron, Nathan Simonson, Anjan Truffer</i>	
4. Mountain Rescue Services	33	Background	77
<i>Fidel Elsensohn</i>		Technical Mountain Clothing	78
Background	33	Carrying Gear	79
The International Commission for Alpine Rescue	33	Personal Technical Mountaineering Equipment	79
Current Status of Mountain Rescue	34	Rescue Techniques	81
		Search and Rescue Services	82

Transport Modes	82	Anaesthesia	136
Communication	89	Methods of Wound Closure	136
Acknowledgements	92	Antibiotics	137
		Tetanus	137
		Rabies	138
		Specific Wounds	138
8. Medical Equipment in Mountain Rescue	93	13. Stabilisation and Splinting	143
<i>Fidel Elsensohn, Urs Pietsch</i>		<i>Herbert Mayer, Herbert Forster</i>	
Introduction	93	Medical Background	143
Epidemiology	93	Principles of Stabilisation and Splinting	143
History of Medical Care in Mountain Rescue	94	Splinting in Mountain Rescue	144
Concepts of Medical Care in Mountain Rescue	95	Splints for Specific Anatomic Sites	145
Medical Equipment in Mountain Rescue	95		
Current Status of Medical Equipment	102	14. Multiple Trauma	149
Recommended Medical Equipment for Mountain Rescue	105	<i>Günther Sumann, Sven Christjar Skaiaa, Monika Brodmann Maeder</i>	
Conclusions	107	Introduction, Terms, and Definitions	149
		Background and Epidemiology	150
		Injury Mechanisms	150
		Pathophysiology of Multiple Trauma	151
		Initial Assessment, Acute Interventions, and Decision-Making	151
		Stabilisation	153
		Specific Patterns of Injury	157
		Victim Packaging	161
		Medical Care During Rescue Procedures and Transportation	161
Section V On-Site Treatment	111	15. Fractures, Dislocations, and Spinal Injuries	165
		<i>Herbert Forster, Herbert Mayer, Hermann Brugger</i>	
9. Introduction to On-site Treatment in Mountain Emergency Medicine	113	Fractures and Dislocations of the Extremities	165
<i>Oliver Reisten, Hermann Brugger</i>		Pelvic Fractures	171
Introduction	113	Spinal Injuries	172
Mountain Emergency Medicine	114		
Mountaineering and Mountain Rescue	114	16. On-Site Surgical Interventions	177
Human Factors	115	<i>Luigi Festi, Giulio Carcano, Giuseppe Ietto, Guido Giardini</i>	
		Introduction	177
10. Safety	117	Diagnosis	177
<i>John Ellerton, Johannes Schiffer</i>			
Background	117	Special situations	
Science	117	17. Climbing Accidents	191
How Do We Improve the Safety of Our Rescues?	119	<i>Volker Schöffl, Christoph Lutter, Thorsten Keil</i>	
Crew Resource Management	119	Background and History	191
		Epidemiology	192
11. Casualty Assessment and Risk Management in the Mountains	125	Injury Patterns	192
<i>Fidel Elsensohn</i>		Management and On-Site Medical Treatment	194
Introduction	125		
General Considerations	125	18. Suspension Syndrome	201
Safety of Rescuers and Victims	126	<i>Simon Rauch, Christian Nußbickel, Raimund Lechner</i>	
Primary Survey	126	Background, History, and Epidemiology	201
Secondary Survey	127	Pathophysiology	202
Special Situations	128	Prevention	202
Point of Care Ultrasound (POCUS)	130	Treatment	204
Risk Assessment and Management in Mountain Rescue	130		
Trauma care			
12. Wound Care	133		
<i>Mike Greene</i>			
Background	133		
Pathophysiology	133		
Wound Assessment	134		
Haemorrhage Control	134		
Personal Protective Equipment and Safety	135		
Prolonged Field Care	135		

19. Accidental Hypothermia	207	23. Aviation Accidents	279
<i>Peter Paal, Douglas J. Brown</i>		<i>Iztok Tomazin, Corinna Ariane Schön, Monika Brodmann Maeder</i>	
Epidemiology	207	Background	279
Primary and Secondary Hypothermia	207	History	280
Pathophysiology	208	Epidemiology	280
Diagnosis and Staging	210	Aviation Accidents: General Causes and Medical Consequences	281
Rescue Collapse and After-drop	212	Special Rescue Aspects of Aviation Accidents	282
Out-of-Hospital Treatment	212	Medical Treatment	284
In-Hospital Management	214	Common Aviation Activities in the Mountains	284
Logistics of Managing Accidentally Hypothermic Victims	217		
Outcome	217	24. Canyoning Accidents	295
Acknowledgements	219	<i>Giacomo Strapazzon, Iñigo Soteras, Oliver Reisten</i>	
20. Avalanche Accidents	223	Background	295
<i>Hermann Brugger, Giacomo Strapazzon, Ken Zafren</i>		History of Canyoning and Related Search and Rescue (SAR) Operations	295
Background	223	Epidemiology of Canyoning Accidents and SAR Operations	297
Snow and Avalanches	224	Mechanisms of Injury and Environmental Illnesses	298
Epidemiology	227	Rescue Operations	301
Pathophysiology	229	Canyon Safety	301
On-Site Management	234	Canyoning Equipment	302
Transport and In-Hospital Triage and Management	243	Progression Techniques	304
Treatment	244	Canyon SAR Techniques and Equipment	305
Multi-Casualty Avalanche Accidents	245	Management of Canyon Rescues	307
Prevention, Risk Assessment, and Safety Equipment	245	Evacuation and Transport	313
Medical Training of Avalanche Rescue Teams	248		
Prognosis of Avalanche Victims	248	25. Caving Accidents	317
21. Frostbite	253	<i>Iñigo Soteras, Lana Donlagic, Giacomo Strapazzon, Roger Mortimer</i>	
<i>Emmanuel Cauchy, Ken Zafren, Chris Imray</i>		History and Scope	317
Introduction	253	Epidemiology	318
Epidemiology	255	Hazards and Mitigation	320
Risk Factors	255	Medical Considerations	324
Pathophysiology	255	Management	329
Clinical Features	256	26. Swiftwater Rescue	335
Differential Diagnosis	257	<i>Patrick Wenger, Danica Barron, Stephen Maier</i>	
Criteria for Diagnosis: Frostbite Staging	257	Background	335
Investigations	259	River Hazards and Terminology	337
Treatment	260	Drowning	339
Adjunctive Therapies	263	Hypothermia and Cold Shock	340
Hospital Care	264	Other Causes of Swiftwater Morbidity and Mortality	341
Frostbite on Expeditions	265	Medical Management	342
Prognosis	265	Swiftwater Rescue Principles	342
Sequelae	266	Swiftwater Rescue Pre-Planning	342
Prevention	266	Swiftwater Rescue Techniques	344
Acknowledgements	266	27. Lightning Injuries	351
22. Crevasse Accidents	269	<i>Ken Zafren, Daniel Migliaccio</i>	
<i>Oliver Reisten, Oliver Kreuzer, Alessandro Forti, Hermann Brugger</i>		Background	351
Background	269	History	351
Epidemiology and Patterns of Injury	270	Epidemiology	351
Technical Rescue	271	Science	352
Medical Treatment	273		
Transport	274		

Pathophysiology	352	High Altitude Cerebral Oedema	425
Management and Medical Treatment	355	High Altitude Pulmonary Oedema	426
Prevention	356	Other Altitude-Related Conditions	429
28. Exhaustion and Fatigue in the Mountains	359	33. Psychiatric Emergencies	433
<i>Darryl Joseph Macias</i>		<i>Katharina Hüfner, Barbara Sperner-Unterweger</i>	
Background, History, and Epidemiology	359	Background	433
Muscle Fatigue and Exhaustion	360	Psychiatric Disorders in People Permanently Living at Altitude	434
Central Fatigue and Exhaustion	362	Chief Symptom: Psychomotor Agitation	434
Central Governor Model	364	Chief Symptom: Suicidality	435
The Underappreciated Gastrointestinal Tract Can Cause Fatigue	364	Chief Symptom: Anxiety	435
Prevention of Exhaustion and Fatigue	365	Chief Symptom: Insomnia at Altitude	436
Supplements and Drugs to Mitigate Exhaustion	366	Delirium	436
		Substance Intoxication	437
		High Altitude Psychosis	437
		Acute Stress Reaction and Post-Traumatic Stress Disorder	438
		Somatic Symptom and Related Disorders	439
		Mood at High Altitude	440
		Neuropsychological Impairment at High Altitude	440
		Psychiatric Emergency Medication	440
29. Heat Illnesses	371	34. Medical Emergencies	445
<i>Flavio Gaudio, Grant Lipman</i>		<i>Monika Brodmann Maeder, Bernd Wallner, Darryl Joseph Macias</i>	
Background	371	Introduction	445
Definitions	371	Anaphylaxis	446
Physiology	372	Neurological Emergencies	448
Heat Stroke	373	Respiratory Emergencies	452
Clinical Syndromes	375	Infectious Disease Emergencies	455
Field Treatment of Heat-Related Illnesses	378	Special Situations in Mountain Rescue	456
Hospital Treatment	381	35. Pain Management	461
		<i>Elisabeth Gruber, Mathieu Pasquier, Bruce Brink, Maria Antonia Nerin</i>	
30. Envenomation by Bites and Stings	385	Background	461
<i>Rik De Decker, Gela Tölken</i>		Non-Pharmacologic Management of Pain	464
Introduction	385	Pharmacological Treatment	466
Toxicology vs. Toxinology	385	Regional Anaesthesia	473
Perspective of Threats Posed by Animals That Bite and Sting	386	Children	476
Specific Venomous Animals	387	36. Advanced Airway Management in Mountain Rescue	481
Acknowledgements	398	<i>Alexandre Kottmann, Natalie Hölzl, Peter Paal</i>	
31. Cardiovascular Emergencies at Altitude	399	Background	481
<i>Gianfranco Parati, Dario Pellegrini</i>		Indications for Out-of-Hospital Advanced Airway Management	482
Background	399	Alternatives to Out-of-Hospital RSI and Endotracheal Intubation in the Mountains	483
Sudden Cardiac Death	400	Drugs in Mountain Emergency RSI	484
Acute Coronary Syndromes	401	Preparations for Anaesthesia Induction and Airway Management	486
Pulmonary Embolism	404	Oxygenation and Pre-Oxygenation	486
Arterial Thrombosis	407	Endotracheal Intubation and Ventilation	486
Hypertensive Emergencies	408	Verifying Tracheal Tube Position	487
Acute Heart Failure	409		
Aortic Dissection	411		
Ischaemic Cerebrovascular Events	414		
32. High Altitude Illnesses	419		
<i>Ryan Paterson, Steven Roy</i>			
Background	419		
Definitions	419		
High Altitude Physiology	420		
Prevention of Altitude Illness in the High Altitude Rescuer	421		
Acute Mountain Sickness	424		

Difficult Airway Management	487	42. Multiple Trauma Management	551
Maintenance of Sedation, Monitoring, and Ventilation	488	<i>Pierre Bouzat, Luigi Festi, Julien Gbelfi</i>	
Side Effects of Sedation	488	Introduction	551
Training	489	Trauma System	551
37. Cardiac Arrest in Mountain Areas	493	Triage and Trauma Scores	552
<i>Simon Rauch, Peter Paal</i>		Initial Management and Imaging Strategy	553
Background	493	Surgical Treatment of Severely Injured Trauma Victims	555
Epidemiology and Causes of Cardiac Arrest in the Mountains	493	43. In-Hospital Treatment of Accidental Hypothermia	567
Treatment	495	<i>Peter Mair, Monika Brodmann Maeder</i>	
38. Automated External Defibrillators	505	Introduction	567
<i>Peter Paal, Fidel Elsensohn</i>		In-Hospital Treatment of Mild Accidental Hypothermia with Core Temperature >32 °C	567
Background	505	In-Hospital Treatment of Moderate or Severe Accidental Hypothermia with Core Temperature <32 °C without Cardiac Arrest	568
Epidemiology	506	In-Hospital Treatment of Severe Hypothermia with Cardiorespiratory Arrest	572
Risk of Cardiac Arrest in Mountain Areas	506	Hypothermic Avalanche Victims	575
Automated External Defibrillators	506		
Cardiopulmonary Resuscitation and Automated External Defibrillation	506	Section VII Special Knowledge	579
Requirements for Using Automatic External Defibrillators in Mountain Areas	512		
Technical Considerations for Automatic External Defibrillator Use in the Mountains	512	44. Mass Casualty Incidents in the Mountains	581
Challenges for the Future	512	<i>Marc Blancher, Natalie Hölzl</i>	
39. Termination of Cardiopulmonary Resuscitation in Mountain Rescue	517	Background	581
<i>Peter Paal, Mario Milani</i>		When to Declare a Mass Casualty Incident	581
Background	517	Principles of Disaster Medicine for Mountain Emergency Medicine	582
General Aspects and Ethical Considerations	517	What is Different about MCIs in Mountain and Wilderness Areas?	586
Primary Cardiac Arrest	520	Principles of Management for Specific MCIs	587
Environmental Limitations and Special Circumstances	520	45. Crisis Intervention and Peer Support after Incidents in Mountain Areas	591
Further Considerations	523	<i>Barbara Juen, Heiner Brunner, Ruth Warger, Dietmar Kratzer</i>	
Limitations	523	Psychosocial Support and Psychological First Aid in Emergencies	591
40. Transport	527	46. Occupational Health in Mountain Rescue	599
<i>Alberto Zoli, Gianluca Marconi, Bruce Brink, Mario Teruzzi</i>		<i>Thomas Küpper</i>	
Background	527	History	599
Emergency Rescue Requirements	528	Principles of Health and Safety in Mountain Rescue	599
Preparation for Transport	528	Cold Exposure in Mountain Rescue	600
Use of Helicopters in Mountain Rescue	530	Ultraviolet Radiation	601
Terrestrial (Ground) Transport	536	Infection Control	601
		Health Requirements	601
		Noise Exposure	603
		Assessment of Occupational Health of Helicopter Rescue Personnel	604
Section VI In-Hospital Management	539		
41. Emergency Department Trauma Management	541		
<i>Oswaldo Chiara, Ken Zafren, Stefania Cimbanassi</i>			
Trauma Team	542		
Trauma Triage Criteria	543		
Emergency Procedures	545		

47. Medicolegal Aspects	609
<i>Corinna Ariane Schön</i>	
Background	609
Legal Issues	610
Documentation	613
Death in the Mountains	616
Handling the Media	624
48. Outlook—Giant Steps Forward	627
<i>Hermann Brugger, Peter Paal, Ken Zafren</i>	
Introduction	627
Technologies	627
Index	635
