

Table of contents

CHAPTER 1

Clinical approach to feline patients with skin disorders

General considerations.	1
Signalment and history	2
Physical examination	2
Definition and examples of primary lesions.	3
Examples of secondary lesions	6
Dermatological terms frequently used	9
Approach to the disease	13
Concluding remarks.	13

CHAPTER 2

Diagnostic tests in feline dermatology

General considerations.	15
Skin cytology	16
Skin scraping	19
Direct hair examination	20
Wood's lamp	20
Fungal culture using Dermatophyte Test Media (DTM)	21
Bacterial culture.	23
Skin biopsy.	23
Skin test	24
Patch test	26

CHAPTER 3

Dermatologic therapy

General consideration	27
Therapy for ectoparasites	27
Therapy for fungal infections	28
Therapy for bacterial infections	30
Therapy for allergic and autoimmune diseases	32
Allergies	32
Autoimmune skin diseases.	33
Therapy for diseases of keratinization	34

CHAPTER 4

Clinical approach to feline pruritus

General considerations.	37
Diagnosis of pruritus.	41
Distribution of lesions	41
Diagnostic tools	42
Etiological diagnosis	44

CHAPTER 5

Clinical approach to feline allergic skin diseases

General consideration	47
Food allergies.	47
Environmental allergies	50
Flea allergy	54

CHAPTER 6

Clinical approach to feline superficial fungal infections

Dermatophytosis ("ringworm")	61
Prevalence and development of infection	61
Clinical signs	62
Diagnosis	64
Treatment	67
Environmental decontamination and tips for the management of dermatophytosis in a cattery/shelter setting	69
<i>Malassezia</i> dermatitis	70

CHAPTER 7

Clinical approach to feline ectoparasites

General consideration	75
Fleas	75
Mites	76
Notoedres	76
Otodectes	77
Demodex in cats	79
Cheyletiella	81
Pediculosis	81

CHAPTER 8

Clinical approach to feline crusting dermatitis

General considerations	83
Etiologies of crusting dermatitis	84
Bacteria and parasites	84
Allergic diseases	84
Autoimmune diseases	85
Viral diseases	85
Bullous diseases and vasculitis	85
Idiopathic ulcerative dermatitis	87
Metabolic causes	88

Neoplasia	88
<i>Malassezia</i> overgrowth	89
Primary keratinization alteration	90

Distribution of crusting dermatitis lesions	90
Clinical signs	95
Diagnosis of crusting dermatitis	95
Treatment of crusting dermatitis	97
Pemphigus foliaceus	98

CHAPTER 9

Clinical approach to feline nodular dermatitis

General consideration	103
Clinical approach	103
Importance of signalment and history	103
Physical examination	103
Initial diagnostic approach	104
Infectious diseases	104
Fungal diseases	104
Bacterial diseases	109
Algae and oomycetes	115
Sterile/Inflammatory disease	115

CHAPTER 10

Clinical approach to eosinophilic granuloma complex

Indolent ulcer	121
Eosinophilic granuloma	123
Eosinophilic plaque	126

CHAPTER 11

Clinical approach to feline ulcerative diseases

General consideration	129
Importance of history and physical examination	133
Vasculitis	134

Erythema multiforme	136
Toxic epidermal necrolysis	137
Pemphigus vulgaris	137
Bullous pemphigoid	137
Systemic lupus erythematosus	139
Idiopathic ulcerative disease	139
Indolent ulcers	139
Skin fragility syndrome	139

CHAPTER 12

Clinical approach to feline alopecia

General consideration	143
Distribution and localization of alopecia	145
Diagnostic approach	146
Mechanisms for alopecia	148

CHAPTER 13

Clinical approach to feline otitis

General consideration	153
Factors involved in otitis externa	153
Otitis externa vs. otitis media	154
Diagnostic approach to otitis externa	155
Approach to otitis media	160

Approach to <i>Pseudomonas</i> cases	162
A note about ear cleaners	163

CHAPTER 14

Clinical approach to feline facial dermatitis

General consideration	165
Allergies	165
Parasites	169
Immunomediated diseases	171
Nodular diseases	174
Viral diseases	175
Polychondritis	175
Diseases of the planum nasale	175

CHAPTER 15

Clinical approach to feline pododermatitis and nail diseases

General consideration	177
Terminology	177
Differential diagnosis	178
Infectious diseases	178
Allergic disease	182
Plasma cell pododermatitis	182
Other conditions	182
