PREFACE	VII
----------------------	-----

Ivo Casagrande

Section I ACID-BASE BALANCE

Chapter 1

HISTORY OF BLOOD GAS ANALYSIS AND ACID-BASE BALANCE

Mario Tarantino

CO ₂ , HCO ₃ ⁻ , alkaline reserve	3
Theories of acid-base chemistry and electrometric pH measurement	6
Theories of acid-base physiology	8
Progress in knowledge of acid-base disorders	10
The Danish experience: Poul Bjørndahl Astrup, Ole Siggaard Andersen	14
The Boston school and the “in vivo compensation limits”	17
Peter Stewart and the independent variables	18
References	19

Chapter 2

THE REGULATION OF BLOOD PH

FUNDAMENTALS OF ACID-BASE PHYSIOLOGICAL BIOCHEMISTRY

Mario Tarantino

The buffer function	22
The physiological production of metabolic acids	24
The “volatile acid” CO ₂ d	24
The “fixed acids”	26
The blood pH defense	26
Physiological buffers	26
Physiological adaptations	28

The role of kidney in the acid-base balance	28
Introduction to acid-base disorders.....	31
Respiratory acidosis	31
Respiratory alkalosis.....	32
Metabolic acidosis.....	32
Metabolic alkalosis	33
References	34

Chapter 3

DIAGNOSTIC INTERPRETATION OF ACID-BASE DISORDERS SCHOOLS COMPARISON

Mario Tarantino

The metabolic component. The Henderson equation	37
The Danish school: standard bicarbonate, buffer base, base excess	38
The Boston school: the physiological limits of in vivo adaptation.....	40
Stewart: SID, SIG, dependent and independent variables.....	41
The anion gap.....	43
Diagnostic criteria and revision and correction of diagnostic indices.....	44
Conclusion.....	45
References	45

Chapter 4

CLINICAL INTERPRETATION OF SIMPLE ACID-BASE DISORDERS

Ivo Casagrande

Introduction	47
Arterial blood gas parameters.....	47
The role of the Kassirer-Bleich equation in the understanding of acid-base disorders	48
How to proceed in reading the ABG report and its interpretation	50
Test accuracy and reliability.....	50
Patient history and clinical examination.....	51
pH, PaCO ₂ and [HCO ₃] ⁻	51
Identification of primary disorder	51
Evaluation of electrolytes	51
Calculation of the anion gap	52
Expected adaptations and their clinical use.....	52
pH, electrolytes, urinary anion gap and urinary osmolal gap	53
Clinical interpretation of simple acid-base disorders.....	53

Respiratory acidosis	54
Respiratory alkalosis	59
Metabolic alkalosis	64
Metabolic acidosis.....	69
References	80

Chapter 5

CLINICAL INTERPRETATION OF MIXED ACID-BASE DISORDERS

Ivo Casagrande

Definition	83
Classification of mixed disorders.....	83
Double respiratory disorders	83
Double metabolic disorders	83
Double respiratory and metabolic disorders.....	83
Triple respiratory and metabolic disorders	83
Quadruple respiratory and metabolic disorders	83
When to suspect the presence of a mixed acid-base disorder	84
First rule (mother rule) or the Kassirer-Bleich equation disregarded.....	84
Second rule or failure to comply with adaptation	84
Third rule or pH false compensation	84
Fourth rule or the Δgap ($\Delta\text{AG} - \Delta\text{HCO}_3^-$) or the $\Delta\text{AG}/\Delta\text{HCO}_3^-$ ratio	84
Fifth rule or the Na^+/Cl^- ratio	84
Flow chart for the identification of mixed acid-base disorders.....	84
Double mixed acid-base disorders.....	86
Respiratory alkalosis and metabolic alkalosis (additive disorders)	86
Metabolic acidosis and respiratory alkalosis (counterbalancing disorders).....	87
AG metabolic acidosis and respiratory acidosis (additive disorders)	89
Respiratory acidosis and metabolic alkalosis (counterbalancing disorders)	91
Metabolic acidosis and metabolic alkalosis (counterbalancing disorders)	92
Mixed metabolic acidosis (additive disorders).....	95
Double mixed acid-base disorders, characterized by the superposition	
of an acute disorder to a chronic disorder	97
Acute respiratory acidosis on chronic respiratory acidosis.....	97
Acute respiratory acidosis on chronic respiratory alkalosis	98
Acute respiratory alkalosis on chronic respiratory alkalosis	98
Importance of serum albumin dosage in critically ill patients	100
Triple mixed acid-base disorders	101
Quadruple mixed acid-base disorders.....	105
References	106

Chapter 6

MANAGEMENT OF ACID-BASE DISORDERS*Gaetano Esposito, Rodolfo Sbrojavacca, Nicolò Capsoni, Giulio Cassano, Andrea Bellone*

Premise	109
Treatment of respiratory acidosis	109
Introduction	109
Acute respiratory acidosis treatment	109
Chronic respiratory acidosis treatment	110
Respiratory alkalosis treatment	111
Metabolic acidosis: principles of treatment	111
Treatment of anion gap metabolic acidosis	113
Lactic acidosis	113
Ketoacidosis	118
Toxic alcohols	124
Treatment of hyperchloremic metabolic acidosis	127
Introduction	127
Gastrointestinal losses	127
Renal losses	128
Metabolic alkalosis treatment	129
Introduction	129
Chloride-responsive metabolic alkalosis	129
Chloride-resistant metabolic alkalosis	130
Mixed acid-base disorders treatment	131
Introduction	131
Treatment of the main mixed disorders	132
References	134

Section II

SODIUM AND WATER

Chapter 7

SALT AND WATER IN PHYSIOLOGY AND IN CLINICAL MEDICINE*Mario Tarantino*

Early research	139
From osmosis to aquaporins	140
Salt and water balance regulation	143
Water regulation	143
Salt regulation	144
Salt and water in clinical medicine and therapy	145
Cholera epidemics	146

Enteritis in childhood	147
The replacement venous treatment	148
References	150

Chapter 8

HOMEOSTASIS OF BODY FLUIDS FUNDAMENTALS OF PHYSIOLOGY

Mario Tarantino

Introduction	153
Anatomy of body fluids.....	153
Fluid movement among compartments.....	154
Osmosis, osmolality and tonicity.....	154
Starling forces: hydrostatic pressure and oncotic pressure.....	155
Sodium physiological significance.....	156
Plasma sodium concentration and intracellular volume	156
Total body sodium content and extracellular fluid volume	157
The regulation of osmolality.....	157
Water regulation	157
Physiological function of ADH.....	161
Sodium regulation	163
References	164

Chapter 9

HYPONATREMIA

Ivo Casagrande

Introduction to plasma sodium concentration disorders	165
Definition	165
Pathophysiology	165
Classification.....	166
Pseudohyponatremia.....	166
Hypertonic hyponatremia	166
Isotonic hyponatremia	167
Osmostatic hyponatremia	167
Hypotonic hyponatremia (from inability of the kidney to eliminate water)	167
Hypotonic hyponatremia (from excessive introduction of free water)	167
Clinical and laboratory approach in hypotonic hyponatremia.....	167
Symptoms and signs of hypotonic hyponatremia	168
Laboratory tests.....	169

Causes of hypotonic hyponatremia	170
Hyponatremia from kidney inability to eliminate water and its causes	170
Hypotonic hyponatremia with reduced ECF	171
Hypotonic hyponatremia due to extra renal fluid loss.....	171
Hypotonic hyponatremia due to renal fluid loss	172
Hypotonic hyponatremia with increased ECF	175
Hypotonic hyponatremia with normal ECF	175
Syndrome of inappropriate antidiuresis	175
Hypothyroidism	178
Hypoadrenalism (Adrenal failure).....	178
Low solute diet	178
Hyponatremia due to excessive introduction of free water and its causes	178
Therapy	179
Hypotonic hyponatremia with reduced ECF.....	180
Hypotonic hyponatremia with normal ECF	181
Hypotonic hyponatremia with increased ECF.....	182
References	182

Chapter 10

HYPERNATREMIA

Ivo Casagrande

Definition	185
Pathophysiology	185
Classification	185
Causes of hypernatremia	185
Lack of water intake	187
Renal loss of free water	187
Extra-renal loss of free water	187
Renal loss of hypotonic fluids	187
Extra-renal loss of hypotonic fluids.....	187
Sodium overload	188
Rare causes	188
Clinical and laboratory approach to hypernatremia.....	188
Symptoms and signs of hypernatremia.....	188
Laboratory tests.....	189
Treatment	190
References	192

Chapter 11

THE USE OF FLUIDS IN CLINICAL PRACTICE

Ivo Casagrande

Introduction	193
Anatomy of body fluids and their composition	193
Fluids used in clinical practice	195
Crystalloids	195
Colloids	198
Indications for the use of fluids in emergency and critical care medicine	199
Hemodynamic alterations	200
Water-electrolyte and acid-base disorders	200
Conclusions	201
References	201

Section III ELECTROLYTES

Chapter 12

HYPOKALEMIA

Michele Santoro

Potassium and its homeostasis	205
Hypokalemia definition	207
Hypokalemia and acid-base balance	208
Hypokalemia causes	208
Hypokalemia from reduced potassium intake	208
Redistribution hypokalemia (potassium shift from extra-to-intracellular environment)	209
Hypokalemia from increased loss or elimination of potassium	211
Clinical picture, signs and symptoms of hypokalemia	214
Muscle weakness	214
Cardiac arrhythmias and ECG alterations	214
Alterations in renal function	215
Diagnostic approach of hypokalemia	215
ECG	215
Urinary potassium excretion	216
TTKG (Trans-Tubular K ⁺ Gradient)	217
Blood pH	217
Hypokalemia treatment	220
Type of potassium to be used	220
Calculation of potassium to be infused	220
References	222

Chapter 13

HYPERKALEMIA

Michele Santoro

Introduction	223
Definition	224
Causes of hyperkalemia	224
Increased potassium intake	224
Potassium extracellular shift	226
Reduced urinary potassium excretion	227
Symptoms and signs	229
Muscle weakness	229
ECG alterations and cardiac arrhythmias	229
Diagnosis	230
Treatment	231
Immediate intervention drugs	232
Second intervention drugs	232
Drugs and procedures aimed to eliminate potassium from the body	233
References	234

Chapter 14

HYPOCALCEMIA

Michele Santoro

Introduction	237
Calcium homeostasis	237
Distribution	237
Total calcemia and ionized concentration	237
Plasma calcium level regulation	238
Relationship between PTH, calcitriol and phosphates	238
Hypocalcemia	239
Causes of hypocalcemia	239
Hungry Bone Syndrome	239
Pseudohypoparathyroidism	239
Clinical picture, signs and symptoms of hypocalcemia	240
Diagnostic framework of hypocalcemia	240
Treatment of hypocalcemia	242
References	242

Chapter 15

HYPERCALCEMIA

Michele Santoro

Introduction	245
Causes of hypercalcemia.....	245
Hyperparathyroidism	246
Malignancies.....	246
Granulomatous diseases.....	247
Clinical picture	247
The hypercalcemic crisis	249
Diagnostic approach to hypercalcemia	249
Hypercalcemia treatment	250
References	251

Chapter 16

MAGNESIUM HOMEOSTASIS AND DISORDERS

Michele Santoro

Introduction	253
Magnesium distribution and homeostasis	253
Hypomagnesemia	255
Causes of hypomagnesemia	255
Clinical picture	256
Diagnostic approach to hypomagnesemia	257
Treatment.....	258
Hypermagnesemia	260
References	260

INDEX	263
