

Contents

Chapter 1

Surgical anatomy of the jaws	1
Upper jaw	1
Hard palate	2
Pterygopalatine fossa	3
Internal maxillary artery	3
Cheek	3
Facial nerve	3
Facial or maxillary artery	3
Buccal fat pad	3
Stensen's duct (parotid duct)	4
Lips	4
Mandible	4
Buccal nerve	5
Sublingual space	5
Lingual nerve	5
Lingual artery	6
Sublingual artery	7
Dorsal lingual artery	7
Sublingual gland	7
Recommended reading	7

Chapter 2

Diagnostic imaging and radiological anatomy	9
Anatomical position of the tooth	9
Winter's classification	9
Pell and Gregory's classification	9
Classification of third molars	10
Assessment of root number, shape, and development	13
Relationship with the alveolar canal	13
Computed tomography	18
Impacted upper third molar	19
Impacted lower third molar	19
Impacted canines	20
Supernumerary teeth	20
Dosimetry	20
Recommended reading	21

Chapter 3

Surgical tools and preparation of the operative area	23
General aspects	23
Room preparation	23
Patient preparation	24
Operator preparation	25
Surgical equipment	27
Basic equipment	27
Equipment specifically dedicated for extractive surgery	28
Piezoelectric equipment	28
Ergonomics in the operating room	38
Seated posture for dentists in accordance with the UNI ISO 11226:2019 standard	38
Ergonomic measures: use of headrests	40
Contexts of intervention on the upper jaw	40
Appropriate communication	40
Positioning the upper jaw and dental microscope	41
Common errors	41
Contexts of intervention in the mandible	42
Operating table for oral surgery	42
Recommended reading	43

Chapter 4

Local anesthesia and intravenous sedation: technique and analysis of failures	45
Local anesthetics in dentistry	45
Lidocaine (Xylocaine)	45
Prilocaine (Citanest)	45
Mepivacaine (Carbocaine)	45
Articaine	46
Choosing the type of local anesthesia	46
Factors that influence the choice of the type of anesthesia	46
Type of surgery	46
Surgery duration	46
Anatomical site	46
ASA I patients	47
ASA II and ASA III patients	48

Patients during pregnancy and breastfeeding.....	48
Pharmacologicals for patients with possible allergies	48
Anesthesia for pediatric patients.....	48
Anesthesia of the inferior alveolar nerve	
Direct technique	49
Indirect technique	50
Gow-Gates technique	50
Akinosi technique.....	50
Anesthesia of the buccal nerve.....	51
Anesthesia of the lingual nerve.....	51
Anesthesia of the palatine nerve.....	51
Anesthesia of the nasopalatine nerve.....	53
Anesthesia of the infraorbital nerve	53
Examples of plexus (infiltrative) anesthesia	53
Intravenous sedation	53
Mild sedation: outpatient setting	55
Moderate sedation: outpatient/protected setting	55
Deep sedation: protected setting.....	55
Methodology and drugs	55
Results and benefits	57
References and recommended reading.....	57

Chapter 5

Flap designs and suturing techniques	59
Flap vascularization	59
Flaps for extraction surgery.....	59
Envelope flap without releasing incisions	60
Triangular flap.....	60
Trapezoidal flap.....	60
Marginal flap	60
Paramarginal flap.....	60
Suturing techniques	64
Tissue healing.....	64
Suturing equipment	65
Surgical needles	65
Suture threads	65
Classification of suture threads	65
Surgical knots	67
Simple surgical knots	67
Square knot	67
Complete surgical knot	68
Knot of Toupet	68
Suture techniques in extractive surgery.....	68
Interrupted sutures	68
Spiral continuous suture.....	68
Removal of surgical sutures	71
Recommended reading	71

Chapter 6

Piezoelectric surgery: applications and protocols	73
Applications of ultrasonic waves in medicine.....	73
Physics of ultrasonic waves.....	74
Generation of ultrasonic waves	74
Oral piezoelectric surgery	75
Features of piezoelectric cutting	76
Clinical case 1	81
Clinical case 2	82
Piezoelectric unit	85
Piezoelectric extractive techniques	85
Recommended reading	87

Chapter 7

Surgery of impacted upper and lower third molars	89
Introduction	89
Etiopathogenesis of dental inclusion.....	89
Difference between impacted and retained tooth.....	90
Problems related to impacted teeth.....	90
Pericoronitis.....	90
Periodontal disease localized in adjacent impacted teeth	92
Caries	92
Orthodontic problems.....	92
Prosthetic problems	92
Odontogenic cyst.....	92
Odontogenic tumors	92
Extraction of lower third molars	96
Extraction in vertical position	96
Clinical case 1	99
Clinical case 2	100
Clinical case 3.....	101
Clinical case 4.....	102
Clinical case 5.....	103
Clinical case 6.....	104
Clinical case 7	105
Extraction in mesioversion	106
Clinical case 8.....	108
Clinical case 9.....	110
Clinical case 10.....	112
Extraction of horizontal lower third molars	114
Clinical case 11.....	116
Clinical case 12	117
Extraction of horizontal lower third molars in distoversion.....	119
Clinical case 13	120

Extraction of maxillary third molars	122
Clinical case 14	124
Clinical case 15	126
Clinical case 16	128
Clinical case 17	129
Clinical case 18	130
Recommended reading	131

Chapter 8

Germectomy

Indications and surgical technique

Indications	134
Clinical case 1	135
Clinical case 2	136
Clinical case 3	139
Clinical case 4	141
Recommended reading	143

Chapter 9

Surgical-orthodontic recovery and supernumerary teeth

Impacted teeth	145
Impaction of second molars	145
Impaction of premolars	145
Clinical case 1	146
Impaction of canines	148
Diagnosis of impaction	148
Possibility of treatment	148
Cases in which the extraction of the impacted canine is appropriate	148
Clinical case 2	150
Clinical case 3	151
Clinical case 4	153
Clinical case 5	153
Clinical case 6	155
Clinical case 7	156
Supernumerary teeth	157
Clinical case 8	158
Recommended reading	159

Chapter 10

Pre- and postsurgical pharmacology and management of patients at risk

Pre- and postsurgical pharmacology	161
Preoperative treatment	161
Antibiotic therapy	161
Pain medications	161
Cortisone-based drugs	162
Management of patients at risk	162
Patients with diabetes	162
Patients under anticoagulant therapy	162
Patients on bisphosphonate therapy	163
Postoperative indications	164
Bleeding	164
Diet	164
Oral hygiene	164
Recommended reading	165

Chapter 11

Intraoperative and postoperative complications

Intraoperative complications	167
Lesions of adjacent teeth	167
Dislocation of temporomandibular joints	167
Fracture of roots/apexes	167
Bone fracture	167
Soft tissue laceration	169
Foreign bodies of the airways	169
Postoperative complications	169
Edema	169
Trismus	170
Pain	170
Hematoma, hemorrhage, and ecchymosis	170
Dry socket	172
Neurological complications	173
Recommended reading	175
