

Table of contents

Chapter 1

Overview of diode laser physics

L. Zamprota, E. Trevisiol

Laser physics	1
Laser beam characteristics	3

Chapter 2

Diode laser overview: how it is done and how to manage it

E. Ruga

Main unit	8
Connection between main unit and means of transport-conduction	10
Power supply system	11
Pedal	11
Means of transport/conduction of the laser beam	11
Optical fibers	12
Handpieces	15
CONTACT handpiece	15
Handpiece with interchangeable inserts (MULTITIP silver)	16
Biostimulation handpiece	16
Flat wave handpiece	17
Intraoral biostimulation terminal for MULTITIP handpiece	18
Bell-shaped biostimulation terminal for MULTITIP handpiece	18
Whitening arch for MULTITIP handpiece	19
Focused handpiece for sapphire inserts	19
Telescopic zoom terminal	20
Connections between handpiece and inserts	20
Inserts	21
Cable inserts	21
Interchangeable fiber optic inserts (MULTITIP)	22
Sapphire inserts	22

Chapter 3

Laser safety

E. Trevisiol, L. Zamprota, M. Signorini

Risk assessment	27
Labeling	28
Classification of lasers	29
Risk assessment for sensitive individuals	30
Risks of exposure to laser radiation	31
Distances for prevention	32
Prevention strategy	32
Prevention measures	33
Quality test on laser equipment	33
Safety checks on laser equipment	33
Main types of accidents	33
Radiation protection	35
Health surveillance	37
Training and information	37
Microscopy, magnification systems and LASERS	37
Suggestions	37
Magnifying loupes	38

Chapter 4

Overview of laser history and introduction to current dental applications

R. Riversa, M. Garrone, E. Trevisiol, V. Partipilo, M. Maggioni, E. Ruga

Introduction to dental laser applications	42
Management, preparation, activation of optical fiber of diode laser	51
Optical fiber management	51
Pre-use steps of the diode laser in the dental field	52

Chapter 5

Photobiomodulation: actuality and future perspectives

M. Garrone, L. Barreiro, E. Ruga

Low Level Laser Therapy	55
-------------------------	----

History of the LLLT	55	Periodontal plastic surgery	88
Advantages of the LLLT	56	Chapter 8	
Mechanism of action	56	Diode laser in implant dentistry	97
Effects on tissue	56	E. Amerio, R.M. Calvi, M. Garrone, A. Etemadi, E. Ruga	
Irradiation parameters	56	Laser-assisted peri-implant soft-tissue management	98
Applications in dental procedures	57	Implant uncovering	98
Surgery	57	Surgical technique	98
Bisphosphonate-related osteonecrosis	58	Laser assisted therapy of peri-implantitis	
Orthodontics	58	E. Amerio, E. Ruga	
Periodontology	59	Peri-implantitis definition	106
Aggressive periodontitis	59	Peri-implantitis risk factors	107
Gingivitis	59	Introduction to treatment of peri-implantitis	107
Peri-implantitis	59	Role of diode laser in the treatment of peri-implantitis	108
Dental reimplantation	59	Safety and antimicrobial effect	108
Management of temporomandibular joint disorders	60	Photobiomodulation effect	109
Muscle alterations	60	Photosensibilization	109
Dentin hypersensitivity	62	Clinical studies	109
Endodontics	62	Concluding remarks	110
Oral medicine	63	Clinical protocol according to the authors	110
Radio-induced mucositis	63		
Nerve repair	63	Chapter 9	
Chronic idiopathic orofacial pain	64	Diode laser in restorative dentistry	119
Obstructive Sleep Apnea Syndrome	66	E. Ruga, M. Garrone, R.M. Calvi, M. Amoroso, M. Pelliccia	
		Gingivectomy	119
Chapter 6		Gingivoplasty and clinical crown lengthening	120
Dental whitening	71	E. Ruga, M. Garrone, R.M. Calvi	
R.M. Calvi, H.S. Marjara, E. Ruga		Laser-assisted clinical crown lengthening	120
Clinical procedure	72	Dental dam punching with diode laser	123
Laser-assisted teeth whitening	72	E. Ruga, M. Garrone, R.M. Calvi	
Internal and external whitening in case of non-vital teeth	76	Hard tissue decontamination	125
Gingival whitening	76	E. Ruga, M. Garrone, R.M. Calvi	
Description of the operative technique	76	Pretreatment of adhesive systems	
		E. Ruga, M. Garrone, R.M. Calvi	125
Chapter 7		Use of the diode laser in the clinical protocol	
Diode laser in periodontology	81	of dentin desensitization	126
E. Amerio, A. Etemadi, E. Ruga		M. Amoroso, M. Pelliccia, E. Ruga	
Periodontitis: case definitions and phases of treatment	81	Dentin hypersensitivity	126
Phases of treatment of periodontitis	81	Laser-assisted desensitization	126
Definition of periodontal stability	82	Recent clinical studies	127
Role of diode laser in the treatment of periodontitis	82		
PHASE 2: Causal related therapy	82		
PHASE 3: Treatment of the residual pockets	84		
PHASE 4: Supportive periodontal care	85		
Concluding remarks	85		
Clinical protocols and laser setting in periodontal treatment	88		

Chapter 10**Diode laser in endodontics** 131

R. Riversa, E. Ruga

Possible uses of endodontic diode laser 134

Mode to use diode laser in endodontic therapy 135

Photo-activated decontamination (PAD) 142

PAD procedure 142

Chapter 11**Diode laser in prosthetic dentistry** 149

D. Nocentini, A. Paccagnella, C. De Vito, M. Garrone, E. Ruga, H.S. Marjara

Preprosthetic management of soft tissues in fixed
and removable prosthodontics 149

Laser-assisted dental impression 149

Sinergy between laser and digital methods 155

Chapter 12**Diode laser in oral medicine** 159

M. Garrone, A. Etemadi, E. Ruga

Potentially malignant disorders 159

Leukoplakia 159

Oral lichen planus 160

Pemphigus vulgaris 162

Mucous membrane pemphigoid 162

Recurrent aphthous stomatitis 162

Herpes simplex virus infection 163

Medication-related osteonecrosis of the jaw 164

Vascular anomalies 165

Burning mouth syndrome 166

Laser-assisted biopsy techniques 166

Stages of a biopsy performed by diode laser 169

Summary tables: 915 nm diode laser, parameters
of use in oral medicine 171**Chapter 13****Diode laser in oral surgery** 175E. Ruga, M. Garrone, H.S. Marjara, M. Pelliccia, A. Agnone,
P. Nocentini, A. Simeone, R. Ruga, V. Carbone

Management of the postextractional alveolar socket 176

Incision of abscess collections 178

Incision for the design of surgical flaps 178

Surgical sutures and diode lasers 178

Sutures, when? 178

Removal of sutures 178

Oral soft tissue plastic surgery 183

Frenectomy 183

Lingual frenectomy 184

Plastic and fornix exploitation 192

Surgical exposure of teeth 198

Surgical exposure of deciduous
and permanent teeth in the developmental age 198Surgical exposure of third molars
and other permanent teeth 203

Gingival hypertrophy 205

Removal of oral neoformations 205

Surgical technique 212

Surgical treatment of lymphoepithelial cysts
of the oral cavity 212

Surgical treatment of HPV-related neoformations 212

Surgical pathology of the salivary glands 216

Mucocele of the oral cavity and diode laser 216

Sialolithiasis 224

Ranula 224

Chapter 14**Introduction to laser applications
in esthetic medicine** 239

E. Ruga, M. Garrone, R.M. Calvi, R. Ruga

Foreword 239

Diagnostic pathways 240

Dermoscopy 240

Esthetic surgical treatment of lesions
and neoformations of the skin 240

Biostimulation of perioral tissues 240

Esthetic treatment of low-flow vascular anomalies
and malformations of the face 243

Laser-lifting 243

Subject index 246
